Species

The figure displays a density plot (purple curve) and four data points (black dots) on a coordinate system ranging from 0 to 100 on both axes. The density curve is highly peaked on the left side of the plot, indicating a high concentration of data points in that region. The data points are located at approximately (10, 10), (15, 15), (20, 20), and (80, 10).
